

Lesson 2

There are 4 groups of terrestrial plants

1. Mosses (bryophytes)
2. Ferns and their relatives (pterophytes)
3. Gymnosperms - non flowering
4. Angiosperms - flowering

1. Bryophytes (mosses and their relatives)

lack a vascular system (piping system)

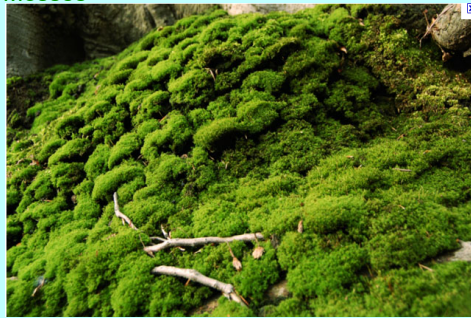

need to live near water, draw water by osmosis

have the ability to hold rain water

need water to transport reproductive cells

3 groups:

Mosses

Liverworts

Hornworts
